Criteria for the sustainable procurement of Office Furniture

Version: 1.5

Date: October 2011
This criteria document for the sustainable procurement of Office Furniture has been drawn up at the instructions of the Dutch Ministry of Infrastructure and the Environment.

1 Introduction

The Dutch government would like to take concrete steps towards a sustainable society and wants to set a good example. If the public authorities pursue sustainable procurement, the sustainable products market will receive a substantial boost. The different government authorities have set objectives for themselves with regard to sustainable public procurement. To achieve the objectives, sustainability criteria have been developed for a large range of the Products, Services and Public Works that the authorities procure. These criteria are not regulations but are intended to provide a point of reference to procure sustainably.

This document focuses on the criteria for the Office Furniture product group, the elaboration of the criteria in specification texts and a more detailed assessment of the criteria, as well as a number of points for attention in the pre- and post-procurement stages. Additional background information and considerations regarding the content of the criteria can be found in the criteria document on the PIANOo (Dutch Public Procurement Expertise Centre) website, available in Dutch only.

1.1 Definition of the product group

This product group concerns all Office Furniture that an organisation can purchase, such as desks, chairs (office chairs, canteen chairs, meeting room chairs), table, settees, cupboards, worktops and storage facilities. School furniture is not part of this product group. The criteria for this product group are also not applicable to the purchase of second-hand office furniture.

Office furniture forms part of the total fitting out of an office. The other components which are related to office furnishing, such as soft furnishings, hardware and networks, are included in separate product groups.

For the benefit of the contracting authority, a number of CPV codes that might be of relevance to this product group have been included in this document. The selection is by no means exhaustive or complete. The contracting authority retains responsibility for compiling the correct set of CPV codes that matches the relevant tender.

The following CPV codes apply to this product group:

- 39120000-9 Tables, cupboards, desks and bookshelves.
- 39121000-6 Desks and tables.
- 39121100-7 Desks.
- 39121200-8 Tables.
- 39122000-3 Cupboards and bookcases.
- 39122100-7 Cupboards.
- 39122200-5 Bookcases.
- 39130000-2 Office furniture.
- 39131100-0 Archive shelving.
- 39132100-7 Filing cabinets.
- 39133000-3 Display units.
- 39134000-0 Computer furniture.
- 39134100-1 Computer tables.
39135000-7  Sorting tables.
39135100-8  Sorting frames.
39141100-3  Shelves.
39141200-4  Worktops.
2 Sustainability in the procurement process

The criteria in this document are divided amongst the various steps in the procurement process. More information about the steps in the public procurement process and the way in which sustainability can be included therein can be found on the PIANO (Dutch Public Procurement Expertise Centre) website. It is recommended that you refer to this information before you get started with the criteria for this product group.

2.1 Preparatory stage (points for consideration)

Every purchase or call for tender starts with drawing up the inventory of the needs of the internal or external customer. Sustainability can be incorporated into this stage by considering whether the purchase is truly necessary and whether a more sustainable alternative might be available. No specific points for consideration have been formulated for the purchase of the product group Office Furniture.

2.2 Specification stage (criteria)

During the specification stage, the needs of the internal or external customer are translated into a tender document. This stage entails the formulation of:

- Criteria for supplier qualification. These could include grounds for exclusion, suitability requirements, i.e. requirements with regard to suppliers, and, in the case of restricted procedures, any selection criteria, i.e. wishes with regard to suppliers.
- A description of the minimum requirements pertaining to supply, service or task (the Schedule of Requirements).
- Award criteria, i.e. wishes regarding Supplies, Services and Public works. These are only applicable when the tendering process is based on the principle of the Most Economically Advantageous Offer (‘Economisch Meest Voordelige Inschrijving’ or EMVI).
- The contract stipulating the contract provisions.

More information on the various types of criteria and the various tender options can be found in the Sustainable Public Procurement Manual. Innovation is also included in the award criteria, where relevant. Innovation is oriented towards the development and introduction of new ideas and products.

The criteria in this document have been formulated to support the purchaser in the Sustainable Public Procurement of Office Furniture. The criteria have been subjected to legal review. However, every procurement and tender process is unique. For that reason, the drafting of a tender document remains the responsibility of the purchaser.

2.2.1 Supplier qualifications

No criteria have been formulated for this specific product group with regard to supplier qualification.
### 2.2.2 Schedule of requirements

#### Minimum requirements

<table>
<thead>
<tr>
<th>Minimum requirement No. 1</th>
<th>The furniture to be supplied must have a lifetime of at least 5 years in daily use in an office environment, counted from the day of delivery.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Notes for purchaser</td>
<td>-</td>
</tr>
<tr>
<td>Minimum requirement No. 2</td>
<td>Replacement parts must remain available for 10 years after the date of delivery of the furniture. By &quot;parts&quot; are to be understood all components of the furniture: from worktop and seat to hinges, castors, etc.</td>
</tr>
<tr>
<td>Notes for purchaser</td>
<td>This requirement is included to facilitate maintenance and recycling.</td>
</tr>
<tr>
<td>Minimum requirement No. 3</td>
<td>The panel material used in the furniture must comply with formaldehyde class E1, defined according to EN 120, EN 717-1 or EN 717-2.</td>
</tr>
<tr>
<td>Notes for purchaser</td>
<td>For chipboard, OSB and MDF, EN 120 or EN 717-1 is usually used for the definition. For plywood, furniture panels and coated or overlaid panel material, EN 717-2 or EN717-1 is used. The standards listed first are the methods mostly used. In both cases, EN 717-1 may also be used, but that is a more expensive method.</td>
</tr>
<tr>
<td>Minimum requirement No. 4</td>
<td>The textile used in the furniture:</td>
</tr>
<tr>
<td></td>
<td>- must contain no chlorinated artificial fibres;</td>
</tr>
<tr>
<td></td>
<td>- must contain no halogenated fire retardants, except where use of one or more such substances is stipulated on the basis of legal regulations;</td>
</tr>
<tr>
<td></td>
<td>- must contain no benzidine-analogue dyestuffs;</td>
</tr>
<tr>
<td></td>
<td>- must not in the pigments and dyestuffs or specific textile fibres exceed the following concentrations of heavy metals:</td>
</tr>
<tr>
<td></td>
<td>- antimony: 300 mg/kg (polyester) and 50/250 mg/kg (dyestuff/pigment);</td>
</tr>
<tr>
<td></td>
<td>- arsenic: 50 mg/kg (dyestuff/pigment);</td>
</tr>
<tr>
<td></td>
<td>- total chromium: 100 mg/kg (dyestuff/pigment);</td>
</tr>
<tr>
<td></td>
<td>- copper: 250 mg/kg (dyestuff);</td>
</tr>
</tbody>
</table>
Notes for purchaser

Minimum requirement No. 5

The coating used in/on the furniture must comply with the limit values for emission of antimony, arsenic, barium, cadmium, chromium, lead, mercury and selenium as listed in EN 71-3.

Notes for purchaser

Minimum requirement No. 6

Materials must be able to be separated from the other materials in the furniture using common-or-garden tools (except for the surface treatment). This requirement does not apply to:
- composites or composite panels;
- components such as a gas strut, control box or electric motor for which the manufacturer prescribes that this may only be disassembled by qualified personnel.

Notes for purchaser

This requirement is included to facilitate maintenance and recycling. Examples of composite panels are sandwich panels with a cardboard honeycomb or polystyrene core and MDF, melamine-coated chipboard, plywood or aluminium outer surfaces.

2.2.3  Award criteria

Award criteria

Award criterion No.1

The higher the percentage of the furniture to be supplied, calculated by supply price, which is accompanied by a composition label, the higher this part of the tender will be evaluated.

By supply price is to be understood the price established in the agreement multiplied by the amount purchased by the contracting authority.

The label should show the total of all the materials used in the furniture and the weight of these materials. This weight is to be expressed in descending order as a percentage of the total weight of the furniture and totalling at least 95% of the total weight of the furniture.
The supplementary vocabulary 'Section A: Materials in the EU CPV list' as shown in EC Regulation No. 2195/2002 and the associated annexes, is to be used for the different material types.

This list is included in Appendix 1 and may also be found via: http://www.europeseaanbestedingen.eu/europeseaanbestedingen/europese_aanbesteding/cpv_codes (Excel). Where this list is not sufficient, the tenderer may deviate from this terminology. Where components consist of a mix of multiple materials, the two materials present in greatest proportion must be listed.

Notes for purchaser

This award criteria is included to facilitate maintenance and recycling.

In the criteria it is stated: ‘the furniture to be supplied […] is accompanied by’, which means that the information may be supplied with each product, but may also be supplied with the whole of the delivery or with the offer. The information may be supplied on paper or digitally.

2.2.4 Contract

Social aspects

| Contract provision no. 1 | • Social conditions have been drawn up to promote international working standards and human rights in the international production supply chain with the intention of applying them to tenders in addition to the European threshold values. See the PIANOo website about social conditions.
  | • Points of reference have been drawn up for the promotion of labour force participation for those people who do not have ready access to the labour market (Social Return). See the PIANOo website about Social Return. |

Notes for purchaser

Sustainability also has a social perspective in addition to the environmental one. The social aspect has been elaborated in a few generic instruments for sustainable public procurement and, therefore, it has not been included in this product group-specific document. The agreements about applying these instruments differ per government sector.

2.3 Utilisation stage (points for consideration)

Once the procurement stage has been concluded and a product or service has been purchased, there are opportunities for using the product in a sustainable manner. There are no specific points for consideration for this product group.
