Banking Stimulation of Sustainable Energy Production

Flexible use of subsidizable sustainable energy production

Not valid for wind projects with wind factor. Different banking rules apply to offshore wind projects and to co-gasification and co-firing of biomass in coal-fired power stations.

Overproduction

(Backward banking)

Carrying over the overproduction to the coming year

Year 1

Overproduction

Subsidizable production

Grant

Year 2

Maximum subsidizable annual production

Subsidizable production

Used banking

Banking balance overproduction

max. 25% subsidizable annual production

Banking balance underproduction

no maximum

Productions from

1 Jan 2015

Underproduction

(Forward banking)

Making up for underproduction in the coming year

Year 1

Underproduction

Subsidizable production

Grant

Year 2

Maximum subsidizable annual production

Subsidizable production

Used banking

Banking balance underproduction

no maximum

Productions from

1 Jan 2012
