

# Banking Stimulation of Sustainable Energy Production

Flexible use of subsidizable sustainable energy production

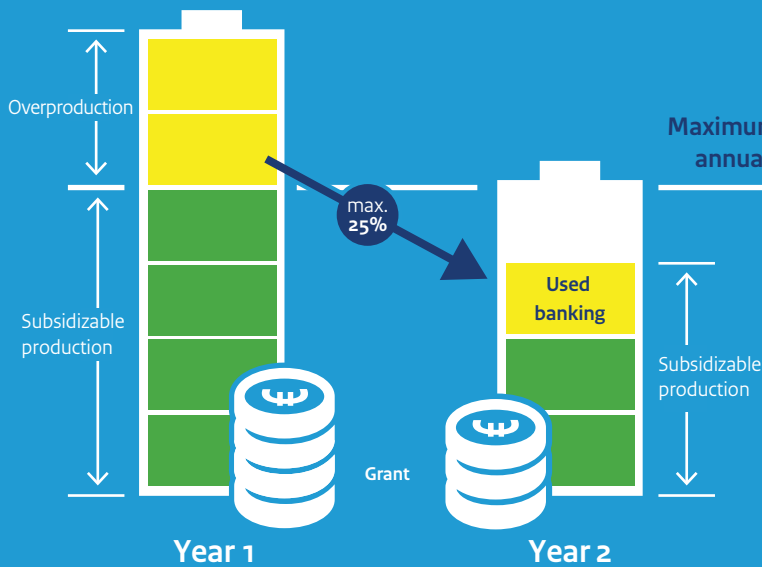

Not valid for wind projects with wind factor.

Different banking rules apply to offshore wind projects and to co-gasification and co-firing of biomass in coal-fired powerstations.

## Overproduction

(Backward banking)

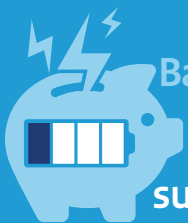

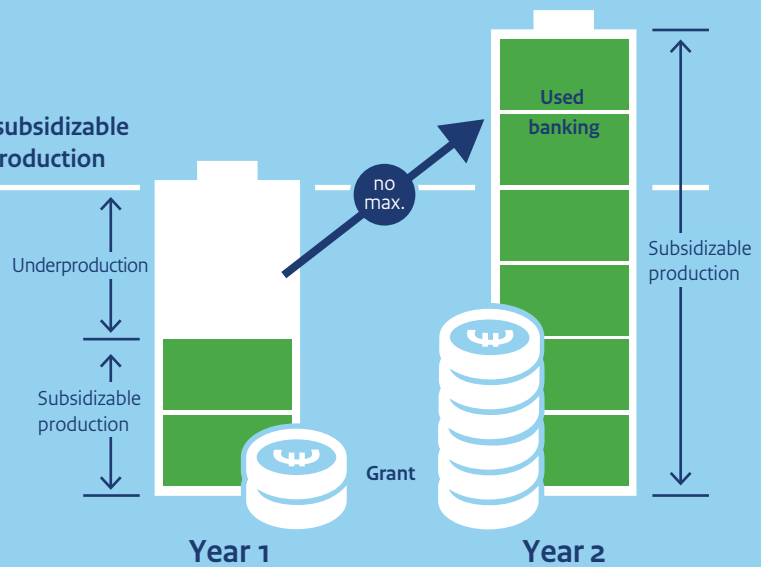

Carrying over the overproduction to the coming year

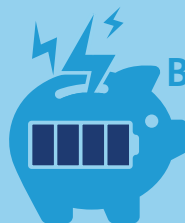

## Underproduction

(Forward banking)

Making up for underproduction in the coming year

Banking balance overproduction  
**max. 25%**  
subsidizable annual production

Banking balance underproduction  
**no maximum**
